SAHIL SINGH

Data Analyst | MIS & Reporting Analyst | Junior Business Analyst

Delhi, India | +91 9667428133 | sahilsingh.data@gmail.com

LinkedIn | **GitHub** | **Portfolio**

PROFESSIONAL SUMMARY

Data Analyst with one year of professional experience (Sep 2025 – Sep 2026) in data cleaning, analysis, reporting and business insights using Excel, SQL, Python and Power BI, with Tableau skills. Portfolio projects demonstrate SQL data modelling, statistical analysis, machine learning and dashboard development.

TECHNICAL SKILLS

SQL & Programming: SQL, MySQL, Python (Pandas, NumPy, SciPy, scikit-learn, Matplotlib, Seaborn)

BI & Reporting: Power BI (DAX, Power Query), Tableau, Advanced Excel (Pivot Tables, XLOOKUP, SUMIFS, INDEX-MATCH), KPI Reporting, MIS Reporting

Analytics & Statistics: EDA, Data Cleaning, Data Validation, Hypothesis Testing, Statistical Analysis, Logistic Regression, Random Forest, K-Means, Segmentation, Root Cause Analysis, Pareto Analysis

Data Modelling & Tools: ETL, Data Modelling, Relational Database Design, 3NF, CTEs, Window Functions, Views, Indexes, Feature Engineering, Git/GitHub, Jupyter, Streamlit, RAG

WORK EXPERIENCE

Junior Data Analyst | Image Retouch India LLP **10 Sep 2025 – 14 Sep 2026**

- Collected and cleaned data using Excel, SQL and Python, applying data validation to maintain data quality and accuracy.
- Queried and analysed data with SQL and Python to generate data-driven insights for business decisions.
- Prepared analytical reports in Excel and Power BI, visualising findings to support business decisions.

PROJECTS

RetainIQ: Telecom Customer Retention Intelligence | MySQL, Python, scikit-learn, Streamlit, RAG **GitHub**

- Analysed 7,043 customer records across a 10-phase pipeline: data-quality audit, cleaning and a MySQL fact/dimension warehouse (views, window functions).
- Applied Welch t-tests, chi-square tests, Logistic Regression, Random Forest (5-fold stratified CV) and K-Means segmentation (k=3); found 26.5% churn (1,869 customers), $3.68M lifetime revenue from churned customers and 64.9% churn in San Diego.
- Built priority scoring, 5–30% recovery scenarios and a Streamlit RAG + SQL assistant (Ollama, Qwen3) that returns evidence-cited answers.

DataCo Supply Chain Analytics | MySQL, Python, Excel **GitHub**

- Normalized 180,519 order lines (65,752 orders) into a six-table MySQL schema with keys, constraints, indexes and views; cleaned source data in Excel.
- Built a SQL query library (CTEs, window functions, Pareto, segmentation, delivery risk) and Python EDA with Pandas, Matplotlib and Seaborn.
- Analysed $36.8M revenue at a 10.8% margin: Fan Shop drives ~46% of revenue; First Class orders took 2 days vs a 1-day schedule; all 1,488 SUSPECTED_FRAUD orders used TRANSFER payments.

Blinkit Grocery Sales Performance Dashboard | Power BI, DAX, Power Query, Excel **GitHub**

- Cleaned and validated data in Power Query (duplicates, missing values, categories, data types) and built an interactive dashboard with DAX measures, KPI cards and slicers for outlet size, location and item type.
- Found in the dataset that Supermarket Type 1 leads sales, Medium outlets earn the highest revenue and Tier 2 outperforms Tier 1 and 3.

EDUCATION

Bachelor of Science (BSCG), Indira Gandhi National Open University, Delhi **2022 – 2026**

CERTIFICATIONS

- Google Data Analytics Professional Certificate (Coursera)
- Microsoft Business Analyst Professional Certificate
- Data Analyst and Visualisation Certification (IFDA Institute)
